

Adhesive Recommendations

Using a quality adhesive for a domestic or commercial application is just as important as choosing the right type of flooring. There is no single adhesive that is recommended for all flooring types and choosing the best one can help your floors last longer and look better.

The table below is a selection of the most compatible adhesives for Airstep Flooring products. These adhesives have been tested in conjunction with the adhesive manufacturers and selected based on a range of factors including the type of flooring, the substrates being adhered to and the amount of traffic the floor may be subjected to.

Selecting the best adhesive for a project is the installers responsibility. If a particular application has unusual site conditions/special requirements and an alternative adhesive needs to be used, you can always check with your preferred adhesive manufacturer or Airstep Flooring representative.

Airstep Flooring Product	Adhesive Manufacturer and Product		
	Roberts/RLA/Green Solutions	Holdfast	UZIN
Luxury Vinyl Plank			
Oatlands (2mm)	Polymer 265 - General application Roberts GS200 - Universal vinyl adhesive, Solvent free, Low VOC, Green Star Compliant. Roberts 280 HT	Holdfast 416 – Multi Purpose Sheet and Tile Adhesive	UZIN KE 2000 S - Universal adhesive UZIN KE 66 - High Temperature vinyl adhesive
